BIOCIRCUITS™

Linking the Body's Energy Centers for Health, Energy and Pleasure.

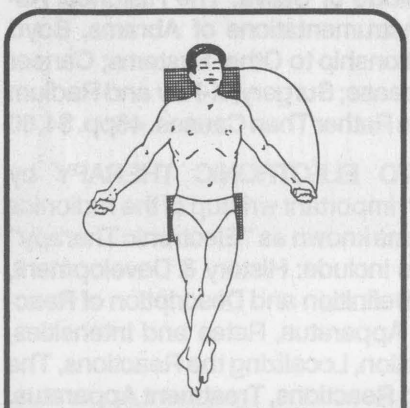
THE POWER OF BIOCIRCUITS

Biocircuitry is a simple principle: by linking the body's key energy centers, BioCircuits enhance the flow of natural energy.

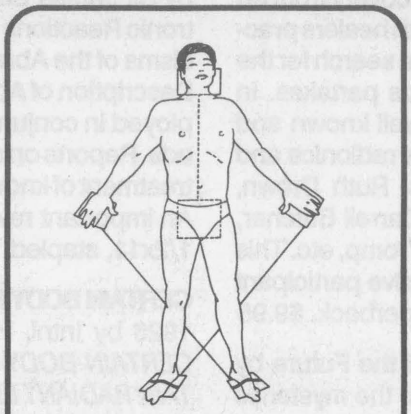
BioCircuits balance, energize and deeply relax the whole person. In just 15-30 minutes a day, they can energize you when tired or calm you when you're overstimulated or stressed. BioCircuits can also induce deep, restful sleep.

BioCircuits promote an "intelligent trance". This state opens the boundaries between physical, emotional, mental and psychic dimensions, heightening intercommunication between deep levels of the being. This helps the body access the natural intelligence of its entire system.

Thus, BioCircuits can foster life-energy sensitivity and psychic abilities. They empower meditative exploration and personal growth. But most often, people use them to become calm, clear and centered.



EEMAN CIRCUIT



LINDEMANN CIRCUIT

BIOCIRCUIT BENEFITS

ENERGY: By linking and balancing the body's energy field, BioCircuits help revitalize energy.

Users report that a 30 minute session refreshes them as deeply as a 2 hour nap, restoring energy and mental alertness.

HEALTH: Because ill health is clearly linked to one's biophysical imbalances, BioCircuits provide easy access to high level well being.

The results are relief from stress, irritability, sleeplessness and fatigue, allowing the body and mind to function at an optimum level.

PLEASURE: For about the price of a single massage, BioCircuits allow a deep experience of one's being, inducing what has been called an "intelligent trance of body and mind."

As you learn to contact and feel the natural energy pleasure of your body, new meditative states deepen, blisses arise and inner exploration is enhanced.

BIOCIRCUITS DISCOVERED

The first modern biocircuit was devised around 1920 by L.E. Eeman in London to heal himself from "incurable" wartime injuries. After his miraculous recovery, Eeman devoted his life to researching the remarkable properties of these elegantly simple tools. In almost 40 years of detailed research Eeman emphasized many medical uses he claimed for biocircuitry. Because his work was never accepted by the medical establishment it fell into obscurity after his death in 1957.

In the 1970's an American researcher, Peter Lindemann, picked up where Eeman left off, doing hundreds of innovative experiments and making many important refinements in the state of the art.

REPORT ON RADIONIC RESEARCH PROJECT Sponsored by The California Society of Chiropractic Radionic Research, Los Angeles, 1953. A serious research project showing the definite existence of the energies in Radionic equipment. Run with strict scientific controls this book was guided by the conviction that the known research work in the field had been based on an unrealistic approach. It was felt that before any attempt is made to determine the modus operandi in this or any other process, it is first necessary to establish beyond reasonable doubt that the process actually takes place. Here are the results for the radionic researcher. $4.00

THE ESSENTIALS OF NUTRITION by Gerhard Schmidt, M.D. Torn between the one-sided materialistic way of looking at nutrition and the ancient nutritional traditions from the Far East, we have to develop sound judgement so that our "daily nutritional practices are in accord with the Spirit." Beginning with milk, a universal foodstuff, Dr. Schmidt discusses protein, the carrier of the vital activity of the formative forces; fats and oils, the stimulators of warmth and the inner intensification of the soul; carbohydrates, the mediators of form and consciousness; and the minerals, the earthly support of human Ego-organization. He shows how we can free ourselves from "vitamin thinking" and replace it with a dynamic method of looking at nutrition. THE BODY ELECTRIC by Robert O. Becker. This book tells the fascinating story of our Bio-Electric selves. Becker, a pioneer in the field of regeneration and its relationship to electrical currents in living things, challenges the established mechanistic understanding of the body. He found clues to the healing process in the long-discarded theory of the 18th century vitalists that electricity is vital to the life process. But as exciting as Becker's discoveries are, pointing to the day when human limbs, spinal cords, and organs may be regenerated after they have been damaged, equally fascinating is the story of Becker's struggle to do such original work. As his understanding of the effects of electrical forces led him to alert the public to their possible effects on the environment, the establishment erected an even higher wall of resistance. This book also explores new pathways in our understanding of evolution, acupuncture, psychic phenomena, and cancer, all within the framework of Dr. Becker's colorful and controversial career. 364 pp, $8.95

ALCHEMY: Science of the Cosmos, Science of the Soul by Titus Burckhardt. Alchemy has been regarded as a primitive form of chemistry with its practitioners labouring to change base metal into gold. However, a close study of the symbolic language of alchemy, and a comparison with similar 'arts' still practiced today in the East, clearly reveal a spiritual method by which we can become conscious of a timeless inner reality. It is man himself who is the dull, raw lead, which by means of a gradual refining process can become Gold of the Sun, a process which can be understood as a rediscovery of the primal condition of the soul. Through the vision of the alchemist, man and cosmos, the inner and outer aspects of nature, may be seen to be related together as images of one another. This universal vision is the key to alchemical symbolism, which is found to reveal unsuspected spiritual horizons. 206pp, $12.95

THE METATRON THEORY by John A. Hilliard. Suggestions Toward A Mathematical Interpretation of the Concepts of Huna & Related Psycho-Physical Problems. "This Metatron Theory is grade-A quality..." Meade Layne. "I am greatly pleased to know that you are reissuing the Metatron Theory. In my opinion, his work is of the greatest importance to those of us who are pioneering the thin fringes of Borderland Sciences. We have been increasingly driven to postulate some form of energy similar to the electro-magnetic, but acting in a very different way - as if under a contrary set of laws. The dowsers and the users of the 'Radionic' instruments, have worked steadily forward in the use of this strange energy which seems in part related to the life energy in living things. John Hilliard is the only one so far to be able to find a place to approach the problem which offers the possibility of understanding the foundation without which we cannot hope to build." Max Freedom Long on BSRF's 1952 reissue of this book. 8-1/2x11, staples. $5.00

WEATHER: Soul Life of the Earth by Dennis Klocek. Modern meteorology has taken the basic perceptions of the qualities Hot, Cold, Wet & Dry, and quantified them into temperature degrees, relative humidity, dew point and many other abstract formulae. These qualities are expressions of the living weather organism which cannot be understood using the quantities of modern meteorology, but can be comprehended via a fluid interaction with the living etheric flows of which the weather is an external manifestation. To perceive the sources of weather we must be able to see the life body of the earth moving in its cosmic rhythms. THE SECRETS OF METALS by Wilhelm Pelikan. With the help of metals humanity has established its position in the world and has transformed the face of the earth. The concord of human bodily functions depends, in many important processes, on marvelous metal-borne effects. Every decade of research acquaints us with new facets of a cosmos of metals within us. In the world outside we come again and again upon new deposits in the earth, which enable us to advance in civilization; in the inner world of the body, ever new layers of activities permeated by metals are lifted into our consciousness. We not only breathe with iron, but we need copper to form our blood and cobalt to escape pernicious anemia. As the methods of investigation become more refined, we constantly discover more metals to be regular components of our bodies. We find them, however, not as building blocks in the grosser sense, but as instruments by which our human entity carries out significant physiological activities. paperback. $10.95

THE FOUR ETHERS by Dr. Ernst Marti. We cannot see the ethers, yet their effects are very much present in everything around us. The formative forces are even harder to conceptualize. As a physician with both a lifelong concern for the living and an eye for the phenomena, Dr. Marti adds another evolutionary step to our understanding of these concepts. Dr. Marti gives a clear, precise view of the elements, ethers and the formative forces of nature. 52pp, paperback. $7.95

THE IDEA OF COUNTERSPACE by Olive Whicher. Here is a brief and thorough introduction to the concept of counterspace essential to the understanding of gravity and its opposite - levity, and to the underlying structure of space and the planets. This is the basis of projective geometry. The Etheric energies reside in counterspace just as the plant resides in the seed. This perspective will certainly aid research by showing where the living energy truly resides. 7pp. $1.00

THE WARMTH COURSE by Rudolf Steiner. A course that strives to extend modern ideas of physics through the understandings achieved by spiritual science. Discusses the nature of warmth, its relationship to the four states of matter, to light, to color, and to the subearthly and super-earthly realms. The Warmth/Fire borderland is an amazing area of research. Fine scientific material! 206pp, paperback. $20.00

THE NATURE OF SUBSTANCE by Rudolf Hauschka. The author's many years of research provides a new perspective on the nature of matter and suggests a new orientation of the sciences. A revitalized scientific practice can grow from a change in the way phenomena are observed: actively *"thinking into"* things, not merely recording measure, weight, and number. In Hauschka's presentation both cosmic and terrestrial spheres are considered in a study of the basic elements and minerals. The basic elements are given as Earth=Carbon, Water=Oxygen, Air=Nitrogen, Fire=Hydrogen, and are referenced to their cosmic position in the Zodiac. This is backed up with years of scientific experiments. Hauschka also explores the mirror realm of coal tar chemistry as a reflection of the living chemistry of the plant world. 235pp. $14.50

PHYSICAL AND ETHERIAL SPACES by George Adams. An understanding of counterspace, the space of the etheric forces. Illustrated, 71 pp, paperback. $6.00

THE PLANT BETWEEN SUN AND EARTH by George Adams and Olive Whicher. The surface of planet Earth is the living skin of a sentient being. Rudolf Steiner indicated that projective geometry could be applied fruitfully to study of plant life and the etheric world. George Adams took up these indications and, together with Olive Whicher, wrote an imaginative book describing this work. This book contains twenty full color plates and many black and white photographs and drawings illustrating the etheric forces interwoven in plant structure. The Etheric realm is readily available to those who open their eyes to the plant world. 224pp, paperback. $35.00

UNIVERSAL MYSTERIES

THE MONUMENTS OF MARS: *A City on the Edge of Forever* by Richard Hoagland. In a wide ranging and profound analysis of the infamous "Face on Mars" author Hoagland, former Science Advisor to CBS News, explains the importance of the "Face" and its implication regarding not only the past but future of the human species. He says, "I realized I was looking at something that was either a complete waste of time, or the most important discovery of the 20th Century if not of our entire existence on Earth. There is no middle ground. It either is or is not artificial... If it is, it is imperative that we figure it out because... IT DOES NOT BELONG THERE. Its presence, if it was made by someone, is trying very hard to tell us something extraordinary." Does the "Face" summon us to Mars? Why is it our face? Why has NASA denied the existence of the artifact? What are the political implications of a Soviet-US manned mission to Cydonia? Who were the "Martians?" How does the existence of the "Face" change our entire history? This book should be one of the most controversial and talked about books of the century. 348 pp, paperback. $14.95

THE SIRIUS MYSTERY by Robert G. Temple. *Is the existence of civilization on earth a result of contact from inhabitants of a planet in the system of the star Sirius prior to 3000 BC?* There are tribal cultures in present-day Africa whose most sacred & secret tradition are based on this theory. Central to their cosmology is a body of knowledge concerning the system of the star Sirius that is astounding in its accuracy of detail, including specific information only recently accessible to modern science. Robert Temple traces the traditions of the Dogon three related tribes back 5,000 years to the ancient Mediterranean cultures of Sumer and Egypt. He shows that these ancient civilizations possessed not only great wealth and learning, but also a knowledge dependent on physics and astrophysics, which they claimed was imported to them by visitors from Sirius. Many have speculated on the subject of extraterrestrial contact, but never before has such a detailed theory been formulated. Temple provides objective facts brought to light over eight years of documented research. The implications of this material for humanity may be entirely unparalleled and will certainly be widely debated. Illustrated with charts and diagrams showing superhuman intervention in ancient life. paperback. $12.95

UFOs AT THE TURNING POINT with William Moore, Budd Hopkins and Stanton Friedman. Bill Moore covers the current status of UFOlogy with the necessary attitude of an ope-minded skeptic. His diligent researchy has overturned a few strongly held beliefs in the UFO field, and he herein puts several miscomprehensions to rest. He has uncovered more questions and he askes them. He discusses the MJ-12 group that was formed by President Truman to assess and manage the UFO situation. Budd Hopkins discusses the abduction phenomenon and shows a series of slides providing physical evidence of UFO abduction cases. The facts are there, he poses some haunting questions through his presentation. Stanton Friedman has valiantly worked through the courts and archive systems of the FBI, CIA, etc, in search of UFO files. He has uncovered definite evidence of a government cover-up, though he, like most of us, still doesn't know exactly what our government is up to in this field. His report on research into the authenticity of the MJ-12 documents adds further evidence to their reality vs disinformation. Overall, this is a most stimulating video, mainly because the lecturers focus on facts, though they speculate (and call it that) where gaps must be filled. VHS, 60 min, color. $39.95

THE LOST CONTINENT OF MU by Col. James Churchward. *Mu, the Motherland,* a lost culture which was the center of civilization some 25,000 years ago. A vanished continent which sent Colonel James Churchward on a lifetime's search, from the vaults of an Indian temple to Australia, from Siberia to the South Seas. In 1868, while serving with the British Army in India, Churchward became close friends with a high temple priest who taught him how to decipher several stone tablets which had lain hidden for centuries in the temple vaults. They told of a vast civilization which had emerged, flourished and decayed long before our own: the Continent of Mu. This is Churchward's story of how he followed the trail of Mu to the ends of the earth and pieced together the picture of a civilization whose influence is still felt throughout the world, though now lost in the mists of time–*Mu, the Motherland*. pbk. $12.95

THE CHILDREN OF MU by Col. James Churchward. The Land of Mu was a huge continent situated in the Pacific Ocean between America and Asia, its center lying somewhat south of the equator. Basing its area on the remains which are still above water, it would have been about six thousand miles from east to west, and three thousand miles from north to south. All the rocky islands, individually and in groups, scattered over the Pacific were once part of continent of Mu. The author spent fifty years piecing together the story of the lost civilization of Mu and in this, his second book he tells the story of the colonial expansion of Mu and the influence of the highly developed Mu culture on the rest of the world. pbk. $11.95

THE SACRED SYMBOLS OF MU by Col. James Churchward. In this, his third book, Churchward delves into the underlying unity of the world's religious symbology and surfaces with he fact that they are derived from a common source – the ancient Continent of Mu. *Mu, the Motherland* from which all later civilizations (ancient, vanished, and current) would draw their inspirations. The author spent fifty years piecing together the story of this highly developed society which flourished in the Pacific Ocean region over 20,000 years ago. pbk. $12.95
